Overview

This document is designed to provide resellers with a step-by-step guide about the processes for purchasing a domain name categorized under Early Access Program (EAP) by Donuts, Inc.

Definition

Early Access Program (EAP) is a special domain registration period for all Donuts' new TLDs. The purpose is to allow general public to register good domain names as soon as possible when a TLD enters General Availability period.

Traditionally, the landrush phase for a new TLD takes place after sunrise phase and before general availability (see terminology below). For all new Donuts' TLDs, general availability occurs after sunrise, skipping landrush phase.

The EAP takes place during the first 7 (seven) days of a TLD's general availability. EAP period starts at 16:00 UTC and ends at 15:59 UTC the following day.

Example: (not actual dates)

```
Jan 01: Sunrise opens at 16:00 UTC
Jan 28: Sunrise closes at 15:59 UTC
.....no access period.....
Feb 01: General Availability - EAP Day 1 opens at 16:00 UTC
Feb 02: General Availability - EAP Day 1 closes at 15:59 UTC
Feb 02: General Availability - EAP Day 2 opens at 16:00 UTC
.....continue.....
Feb 08: General Availability - EAP Day 7 closes at 15:59 UTC
Feb 08: General Availability - Universal Access starts at 16:00
UTC
```

EAP fee

During EAP period, the EAP Fee (separate from registration fee) is required. It must be passed along with the total registration price to CustomerSuppliedPrice parameter. Please keep in mind that the EAP fee is not refundable.

CustomerSuppliedPrice = (number of year * registration price) + EAP fee

Terminology

Sunrise Phase

Sunrise is the period when owners of trademarks have the opportunity to place orders for domain names that contain their owned marks.

Landrush Phase

During Landrush, non-trademark holders may register domains that did not qualify for Sunrise and consist of generic terms, such as loan or car.

General Availability

Public may register any domain names that are still available.

Step 1 - Check Availability

Check domain availability and EAP flag.

Check

```
https://resellertest.enom.com/interface.asp?
UID=ResellID&PW=resellpw&ResponseType=xml&
Command=Check&SLD=shop9&tld=3rdearlyaccess
```

Output

```
<?xml version="1.0" encoding="utf-8"?>
<interface-response>
<DomainName>shop9.3rdearlyaccess</DomainName>
<HasEAPFee>>true</HasEAPFee>
<RRPCode>210</RRPCode>
<RRPText>Domain available</RRPText>
<Command>CHECK</Command>
<APIType>API.NET</APIType>
<Language>eng</Language>
<ErrCount>0</ErrCount>
<ResponseCount>0</ResponseCount>
<MinPeriod>1</MinPeriod>
<MaxPeriod>10</MaxPeriod>
<Server>RESELLERTEST</Server>
<Site>eNom</Site>
<IsLockable>True</IsLockable>
<IsRealTimeTLD>True</IsRealTimeTLD>
<TimeDifference>+8.00</TimeDifference>
<ExecTime>0.125</ExecTime>
<Done>>true</Done>
```

Step 1 - Check Availability

```
<TrackingKey>29bc0316-ad80-4fb7-a8c2-  
af196f0cb3f7</TrackingKey>  
<RequestDateTime>1/24/2014 9:36:55 AM</RequestDateTime>  
</interface-response>
```

Step 2 - Get the Registration and EAP Fees

Retrieve the domain registration price and EAP fee for a domain.

Note: the RegistrationFee output value is 1 year registration price.

PE_GetPremiumPricing

```
https://resellertest.enom.com/interface.asp?
command=PE_GetPremiumPricing&UID=resellid&PW=resellpw&
ResponseType=XML&SLD1=xyz&TLD1=3rdearlyaccess
&ProductType=Register
```

Output

```
<?xml version="1.0" encoding="utf-8"?>
<interface-response>
<results>
<result>
<Domain>shop9.3earlyaccess</Domain>
<IsPremium>true</IsPremium>
<IsEAP>true</IsEAP>
<ICANNFees>0.18</ICANNFees>
<Price>11000.00</Price>
<RegistrationFee>27.00</RegistrationFee>
<EAPFee>11000.00</EAPFee>
</result>
</results>
<Command>PE_GETPREMIUMPRICING</Command>
<APIType>API.NET</APIType>
```

Step 2 - Get the Registration and EAP Fees

```
<Language>eng</Language>
<ErrCount>0</ErrCount>
<ResponseCount>0</ResponseCount>
<MinPeriod>1</MinPeriod>
<MaxPeriod>10</MaxPeriod>
<Server>RESELLERTEST</Server>
<Site>eNom</Site>
<IsLockable/>
<IsRealTimeTLD/>
<TimeDifference>+0.00</TimeDifference>
<ExecTime>0.656</ExecTime>
<Done>>true</Done>
<TrackingKey>6fc5464e-c8bb-4ed4-b7ca-
1a846645d440</TrackingKey>
<RequestDateTime>1/24/2014 1:28:05 PM</RequestDateTime>
</interface-response>
```

Step 3 - Purchase the Domain with EAP Fee

Purchase a domain (real-time) with EAP fee. Additional required parameters:

- **CustomerSuppliedPrice:** EAP fee + total registration price.

In this example, EAP fee is \$11,000 and domain registration fee for 1 year is \$27.

Purchase

```
https://resellertest.enom.com/interface.asp?
UID=ResellID&PW=resellpw&ResponseType=xml&Command=Purchase
&SLD=shop9&TLD=3rdearlyaccess&CustomerSuppliedPrice=11027
```

Output

```
<?xml version="1.0" encoding="utf-8"?>
<interface-response>
<OrderID>161287868</OrderID>
<DomainInfo>
<RegistryCreateDate>2014-01-24
14:06:22.777</RegistryCreateDate>
<RegistryExpDate>2015-01-24 14:06:22.777</RegistryExpDate>
</DomainInfo>
<RegistrantPartyID>
{070A9567-2999-4CF0-8462-E1D0CEC26810}
</RegistrantPartyID>
<RRPCode>200</RRPCode>
<RRPText>Command completed successfully -
161287868</RRPText>
<Command>PURCHASE</Command>
```

Step 3 - Purchase the Domain with EAP Fee

```
<APIType>API</APIType>
<Language>eng</Language>
<ErrCount>0</ErrCount>
<ResponseCount>0</ResponseCount>
<MinPeriod>1</MinPeriod>
<MaxPeriod>10</MaxPeriod>
<Server>RESELLERTEST</Server>
<Site>eNom</Site>
<IsLockable>True</IsLockable>
<IsRealTimeTLD>True</IsRealTimeTLD>
<TimeDifference>+08.00</TimeDifference>
<ExecTime>3.941</ExecTime>
<Done>>true</Done>
<RequestDateTime>1/24/2014 2:06:25 PM</RequestDateTime>
</interface-response>
```

Check the Order

EAP domain registration consists of two (2) components:

- total domain registration price
- EAP fee.

GetOrderDetail

```
https://resellertest.enom.com/interface.asp?  
UID=ResellID&PW=resellpw&ResponseType=xml  
&Command=GetOrderDetail&OrderID=161287868
```

Output

```
<?xml version="1.0" encoding="utf-8"?>  
<interface-response>  
<Order>  
<OrderID>161287868</OrderID>  
<Result>True</Result>  
<BillDate>1/24/2014 2:10:05 PM</BillDate>  
<CCRefNum />  
<OrderBillAmount>$11027.00</OrderBillAmount>  
<AdjustToAccount />  
<Certs>False</Certs>  
<OrderStatus>6</OrderStatus>  
<StatusDesc>Successful</StatusDesc>  
<OrderDate>1/24/2014 2:06:23 PM</OrderDate>  
<OrderDetail>  
<ProductType>Early Access Fee</ProductType>  
<Description>shop9.3rdearlyaccess</Description>  
<Status>Successful</Status>
```

Check the Order

```
<Quantity>1</Quantity>
